Annual Report And Financial Statements for the year ended December 31, 2019

Corporate Governance

The Bank places strong importance on maintaining a sound control environment and applying the highest standards to continue its business integrity and professionalism in all areas of activities. It shall continue its endeavour to enhance shareholders' value by protecting their interests and defend their rights by ensuring performance at all levels and maximizing returns with minimal use of resources in its pursuit of excellence in corporate life.

1. Respective responsibilities

The shareholders' role is to appoint the Board of Directors and the external auditors. This role is extended to holding the Board accountable and responsible for efficient and effective governance.

The Board of Directors is responsible for the governance of the bank, and to conduct the business and operations of the Bank with integrity and in accordance with generally accepted corporate practices, in a manner based on transparency, accountability and responsibility.

2. Board of directors

The composition of the Board is set out on pagess 4 to 5. The Board is chaired by Non-Executive Director and comprises of the Managing Director, one Executive Director and Four Non-Executive Directors.

All Non-Executive Directors are independent of management. The Board has varied and extensive skills in the areas of banking, business management, accountancy and information communication and technology. The Directors' responsibilities are set out in the Statement of Directors Responsibilities on page 11. The Directors are responsible for the development of internal financial controls which provide safeguard against material misstatements and fraud and also for the fair presentation of the financial statements.

The board meets on a quarterly basis and has a formal schedule of matters reserved for discussion.

During the year under review, the Board meetings were held on the following dates:

- March 25, 2019
- June 24, 2019
- September 06, 2019
- December 12, 2019

The attendance of individual directors is as follows:

Name of director	Period	Meetings held during their tenure	Meetings attended
Mr. Vikramaditya Singh Khichi	02 September 2019 to 31 December 2019	1	1
Mr. Dr. Krishnama Chary Mudumba	04 July 2019 to 31 December 2019	2	2
Mr. Saravanakumar A.	01 January 2019 to 31 December 2019	4	4
Mr. Patrick K Njoroge	01 January 2019 to 31 December 2019	4	4
Dr. Winfred N. Karugu	01 January 2019 to 31 December 2019	4	4
Mr. Ramesh Chunilal Mehta	01 January 2019 to 31 December 2019	4	4
Mr. Yogendra Singh Saini	01 January 2019 to 08 May 2019	1	1

The board has appointed various sub-committees to which it has delegated certain responsibilities with the chairperson of the sub-committee reporting to the board. The composition of the sub-committee is set out on page 5.

3. Board performance evaluation

In compliance with the Prudential Guidelines issued by the Central Bank of Kenya and also part of good Corporate Governance, each member of the Board including the Chairman conducted a peer evaluation exercise for the year 2019. This involved a self review of the Board's capacity, functionality and effectiveness of performance against its set objectives. This enabled the Board to assess its areas of strengths and weakness and then know how to balance its skills, expertise and knowledge.

Annual Report And Financial Statements for the year ended December 31, 2019

Corporate Governance

The Board Performance evaluation covered the following:

(a) The Board Self Evaluation

The Board's performance during the year was evaluated by each member where members were allowed to give their opinion on how the Board had performed. Members were satisfied that the Board had performed to their expectations.

(b)) The Board chairman's Evaluation

The Board members assessed the Chairman's performance and noted that the Board managed to achieve its business targets for year 2019 under his Chairmanship. The Chairman was effective during the year.

(c) The Director Peer Evaluation

A Directors' Peer evaluation exercise was conducted for each member. Each director observes performance of fellow Director.

4. Board Committees

Board Audit Committee

The committee comprises three Non-Executive Directors. The committee meets on a quarterly basis and its functions include:

- Monitoring and strengthening the effectiveness of management information and internal control systems.
- Review of financial information and improving the quality of financial reporting.
- Strengthening the effectiveness of internal and external audit functions, and deliberating on significant issues arising
 from internal and external audits and inspections carried out by the Bank Supervision Department of Central Bank of
 Kenva.
- Increasing the stakeholders' confidence in the credibility and stability of the institution.
- Monitoring instances of non-compliance with the International Financial Reporting Standards, applicable legislation and the Central Bank of Kenya Prudential Regulations and other pronouncements.

Board Credit Committee

The committee is chaired by a Non-Executive Director and comprises of the two Executive Directors, two Non-Executive Director and the Head of Credit as convener. It meets at least once in a quarter. The functions of the committee include Credit monitoring, appraisal and approval of credit applications based on limits set by the Board. The committee also monitors and reviews non-performing advances and ensures that adequate loan loss provisions are held against delinquent accounts in accordance with the guidelines issued by the Central Bank of Kenya and International Accounting Standards Board.

Board Risk Management Committee

The committee, chaired by a Non-Executive Director and comprising Managing Director and two other Non-Executive Directors, meets on a quarterly basis to ensure quality, integrity and reliability of Risk Management function and programme by way of assisting the Board of Directors in the discharge of duties relating to the corporate accountability, reviewing the integrity of the risk control systems, monitoring external developments relating to the practice of corporate accountability and providing independent and objective oversight.

5. Management Committees

Asset and Liability Committee (ALCO)

The committee, chaired by the Managing Director, comprising **Executive** Director and various departmental heads, meets on a monthly basis to discuss operational issues and to monitor and **manage** the statement of financial position to ensure that adequate resources are available to meet anticipated fund demands and to monitor compliance with all statutory requirements. The committee is also responsible for developing a framework for monitoring the banking risks including operational, liquidity, maturity, interest rate and exchange rate risks.

Executive Committee (EC)

The committee, chaired by Executive Director and comprising various departmental heads, meets at least three times a year to implement operational plans, annual budgeting, periodic reviews of operations, strategic plans, ALCO strategies, identification and management of key risks and opportunities.

Annual Report And Financial Statements for the year ended December 31, 2019

Corporate Governance

Business Continuity Planning Committee (BCPC)

The committee, chaired by the Managing Director, comprising of Executive Director and various departmental heads, meets on half yearly basis to identify business function groups, Business Impact Analysis (BIA), Prioritization, fixation of Recovery Time Objectives (RTO) / Recovery Point Objective (RPO) for the function groups and identification of the threats to which the Business Processes are exposed and the assessment of the potential damage and disruption associated with these threats realized.

Information & Communication Technology Committee (ICTC)

The committee, chaired by the Managing Director, comprising of Executive Director and various departmental heads, meets on half yearly basis to oversee and report the effectiveness of strategic Information & Communication Technology (ICT) planning, the ICT Budget and actual expenditure, and the overall ICT performance to the Board of Directors and Senior Management periodically.

Directors' Remuneration

The remuneration to all Directors is based on the responsibilities allocated to the Directors, and is subject to regular review to ensure that it adequately compensates them for the time spent on the affairs of the Bank.

Relationship with Shareholders

The Bank is a private limited liability company with the details of the main shareholder set out on the general information page. Shareholders have full access through the Managing Director to all information they require in respect of the Bank and its affairs. In accordance with the guidelines issued by the Central Bank of Kenya, the Bank publishes quarterly accounts in the local newspapers.

Mr. Saravanakumar A. Managing Director

Annual Report And Financial Statements for the year ended December 31, 2019

Directors' Report

The directors submit their report together with the audited annual report and financial statements for the year ended December 31, 2019.

1. Principal activities

The bank is licensed under the Banking Act and provides banking, financial and related services.

There have been no material changes to the nature of the bank's business from the prior year.

2. Business review of financial results and activities

The annual report and financial statements have been prepared in accordance with International Financial Reporting Standards and the requirements of the Kenyan Companies Act, 2015. The accounting policies have been applied consistently compared to the prior year, except for the adoption of new or revised accounting standards as set out in note 1.

The bank recorded a net profit after tax for the year ended December 31, 2019 of Ksh ('000) 4,092,770. This represented an increase of 4.15% from the net profit after tax of the prior year of Ksh ('000) 3,929,580.

Bank revenue increased by 17.80% from Ksh ('000) 11,702,644 in the prior year to Ksh ('000) 13,785,251 for the year ended December 31, 2019.

Bank cash flows from operating activities increased by 11.61% from Ksh ('000) 17,780,745 in the prior year to Ksh ('000) 19,845,182 for the year ended December 31, 2019.

The above figures have been rounded off to the nearest ('000) Kenyan Shillings.

The above movement for the financial results for the year ended December 31, 2019 have been attributed due to the following:

It was reported that Digital lending growth is being driven by mobile penetration which is presumed to have reached 100.1%. This involves use of digital loan applications / modules from mainstream Banks such as M-Shwari, KCB M-pesa and credit-only digital lenders such as Tala and Branch.

The President unveiled new currency notes with new features that replaced the old ones. The country also demonetized old Ksh 1,000 notes. The primary aim of demonetizing was to fight money laundering, counterfeiting and corruption.

During the year, the government launched a national project where persons were registered under one Identity system. The National Integrated Identity Management System (NIIMS) dubbed "Huduma Namba".

The African Export Import Bank has created Fund for Export Development in Africa (Feda) and is exploring opportunities to fund local projects.

In August 2019, Kenya made the first export of 200,000 barrels of her crude oil export.

3. Performance appraisal

Net interest income was Ksh 6.27 Billion for the period ended December 31, 2019 compared to Ksh 5.59 Billion of 2018 translating to an increase of Ksh 0.68 Billion. On the other hand, our treasury investments (government securities, placements, and other securities) contributed to the growth of the balance sheet and closed with Ksh 86.72 Billion as at December 31, 2019 under review compared to Ksh 73.86 Billion as at December 31, 2018 translating to a growth of 17.41%.

4. Future outlook

Mobile Banking: This is expected to enhance customer service delivery and the same is in final stages of implementation. We have started the VAPT process with local vendor and are expecting to finish shortly. After which we will apply for the CBK approval and launch the service for the customers.

Investment in Euro Bonds: We have initiated the process of opening a Custodial account at Bank of Baroda Mauritius and the subsidiary will start investment in Eurobonds once we have the required infrastructure at our Mauritius office.

New product development - Loan to professionals particularly Doctors and Lawyers /Advocates.

Annual Report And Financial Statements for the year ended December 31, 2019

Directors' Report

5. Share capital

Refer to note 27 of the annual report and financial statements for detail of the movement in authorised and issued share capital. Bonus shares of 1:1 were issued during the year.

6. Dividends

The directors proposed a final dividend of Ksh 20 per share (2018: Ksh 30 per share) amounting to Ksh 1.979 billion (2018: Ksh 1.484 billion).

7. Directors

The directors in office at the date of this report are as follows:

	Nationality
Mr. Vikramaditya Singh Khichi	Indian
Mr. Saravanakumar A.	Indian
Mr. Dr. Krishnama Chary Mudumba	Indian
Mr. Patrick K. Njoroge	Indian
Mr. Ramesh Chunilal Mehta	Kenyan
Dr. Winfred N. Karugu	Kenyan
Mr. Yogendra Singh Saini (Resigned w.e.f 08.05.2019)	Indian

8. Events after the reporting period

The financial statements were prepared based on management estimates and judgement as at the reporting date. Subsequent to year-end, there has been a coronavirus (COVID-19) outbreak which may have an impact on those estimates due to change in the business environment in which the Bank operates. However, due to the level of uncertainty resulting from the outbreak, management is currently assessing the impact.

The directors are not aware of any other material event which occurred after the reporting date and up to the date of this report.

9. Statement of disclosure to the company's auditors

With respect to each person who is a director on the day that this report is approved:

- · there is, so far as each director is aware, no relevant audit information of which the bank's auditors are unaware; and
- the directors have taken all the steps that they ought to have taken as a director to be aware of any relevant audit
 information and to establish that the bank's auditors are aware of that information.

10. Terms of appointment of the auditors

Grant Thornton continues in office in accordance with the bank's Articles of Association and Section 719 (2) of the Kenyan Companies Act, 2015 and subject to Section 24(1) of the Banking Act (Cap. 488). The directors monitor the effectiveness, objectivity and independence of the auditors. The directors also approve the annual audit engagement contract which sets out the terms of the auditor's appointment and the related fees.

11. Approval of financial statements

The annual report and financial statements were approved at a meeting by the directors on _____ and were signed on its behalf by:

Africa Registrars - Co. Secretary
Company secretary

Annual Report And Financial Statements for the year ended December 31, 2019

Statement of Directors' Responsibilities

The Kenyan Companies Act, 2015 requires the directors to prepare annual report and financial statements for each financial year that give a true and fair view of the financial position of the bank as at the end of the financial year and of its profit or loss for that year. It also requires the directors to ensure that the bank maintains proper accounting records that are sufficient to show and explain the transactions of the bank and disclose, with reasonable accuracy, the financial position of the bank. The directors are also responsible for safeguarding the assets of the bank, and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors accept responsibility for the preparation and presentation of these annual report and financial statements in accordance with the International Financial Reporting Standards and in the manner required by the Kenyan Companies Act, 2015. They also accept responsibility for:

- designing, implementing and maintaining such internal controls as they determine necessary to enable the
 presentation of annual report and financial statements that are free of material misstatement, whether due to fraud
 or error:
- selecting suitable accounting policies and applying them consistently; and
- making accounting estimates and judgements that are reasonable in the circumstances.

Having made an assessment of the bank's ability to continue as a going concern, the directors are not aware of any material uncertainties related to events or conditions that may cast doubt upon the bank's ability to continue as a going concern.

The directors acknowledge that the independent audit of the annual report and financial statements does not relieve them of their responsibilities.

The annual report and financial statements set out on pages 14 to 64, which have been prepared on the going concern basis, were approved by the directors on ______ and were signed on its behalf by:

Mr. Saravanakumar A. (Managing Director)

Mr. Patrick K Njoroge (Director)

Independent Auditor's Report

To the shareholder of Bank of Baroda (Kenya) Limited

Report on the Audit of the Annual Report And Financial Statements

Opinion

We have audited the annual report and financial statements of Bank of Baroda (Kenya) Limited set out on pages 14 to 64, which comprise the statement of financial position as at December 31, 2019, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the annual report and financial statements, including a summary of significant accounting policies.

In our opinion, the annual report and financial statements present fairly, in all material respects, the financial position of Bank of Baroda (Kenya) Limited as at December 31, 2019, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Kenyan Companies Act, 2015.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the annual report and financial statements section of our report. We are independent of the bank in accordance with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code) and other independence requirements applicable to performing audits of annual report and financial statements in Kenya. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and in accordance with other ethical requirements applicable to performing audits in Kenya. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The directors are responsible for the other information. The other information comprises the Directors' Report and the Audit Committee's Report as required by the Kenyan Companies Act, 2015 of Kenya, which we obtained prior to the date of this report. Other information does not include the annual report and financial statements and our auditor's report thereon.

Our opinion on the annual report and financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the annual report and financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual report and financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the Annual Report And Financial Statements

The directors are responsible for the preparation and fair presentation of the annual report and financial statements in accordance with International Financial Reporting Standards and the requirements of the Kenyan Companies Act, 2015, and for such internal control as the directors determine is necessary to enable the preparation of annual report and financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual report and financial statements, the directors are responsible for assessing the bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the bank or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Annual Report And Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual report and financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual report and financial statements.

Independent Auditor's Report

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual report and financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the
 audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast
 significant doubt on the bank's ability to continue as a going concern. If we conclude that a material uncertainty
 exists, we are required to draw attention in our auditor's report to the related disclosures in the annual report and
 financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on
 the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause
 the bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual report and financial statements, including
 the disclosures, and whether the annual report and financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the annual report and financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In our opinion the information given in the report of the directors on page 9 - 10 is consistent with the annual report and financial statements.

The engagement partner responsible for the audit resulting in this independent auditor's report was D. V. Shah - P/No 1729.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

Corporate information

Bank of Baroda (Kenya) Limited is a private limited company incorporated in Kenya under the Kenyan Companies Act, 2015 as a private limited liability company and is domiciled in Kenya. The bank is licensed under the Banking Act (Cap 488) and provide banking, financial and related services.

The bank operates 13 branches within Kenya.

1. Significant accounting policies

The principal accounting policies applied in the preparation of these annual report and financial statements are set out below.

1.1 Basis of preparation

The annual report and financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective at the time of preparing these annual report and financial statements and the Kenyan Companies Act, 2015 and the Banking Act.

For Kenyan Companies Act, 2015 reporting purposes, the balance sheet is represented in these annual report and financial statements by the Statement of Financial Position and the profit and loss account by the Statement of Profit or Loss and Other Comprehensive Income.

The annual report and financial statements have been prepared on the historic cost convention as modified by the carrying of investments at fair value and impaired assets at their recoverable amount, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below. They are presented in Shillings, which is the bank's functional currency and rounded off to the nearest Thousand Shillings.

These accounting policies are consistent with the previous period, except for the changes set out in note 3.

1.2 Significant judgements and sources of estimation uncertainty

The preparation of annual report and financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Critical judgements in applying accounting policies

The critical judgements made by management in applying accounting policies, apart from those involving estimations, that have the most significant effect on the amounts recognised in the financial statements, are outlined as follows:

Lease classification

The bank is party to leasing arrangements as a lessee. The treatment of leasing transactions in the annual report and financial statements is mainly determined by whether the lease is considered to be an operating lease or a finance lease. In making this assessment, management considers the substance of the lease, as well as the legal form, and makes a judgement about whether substantially all of the risks and rewards of ownership are transferred.

Taxes

Determining income tax liability involves judgment on the tax treatment of certain transactions. Deferred tax is recognised on temporary differences where it is probable that there will be taxable revenue against which these can be offset.

Impairment of loans and advances

The bank's loan impairment provisions are established to recognise incurred impairment losses either on specific loan assets or within a portfolio of loans and receivables.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Impairment losses for specific loan assets are assessed either on an individual or on a portfolio basis. Individual impairment losses are determined as the difference between the loan carrying value and the present value of estimated future cash flows, discounted at the loans' original effective interest rate. Impairment losses determined on a portfolio basis are assessed based on the probability of default inherent within the portfolio of impaired loans or receivables.

Estimating the amount and timing of future recoveries involves significant judgment, and considers the level of arrears as well as the assessment of matters such as future economic conditions and the value of collateral, for which there may not be a readily accessible market.

Loan losses that have been incurred but have not been separately identified at the reporting date are determined on a portfolio basis, which takes into account past loss experience and defaults based on portfolio trends. Actual losses identified could differ significantly from the impairment provisions reported as a result of uncertainties arising from the economic environment.

Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the bank has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the bank uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Key sources of estimation uncertainty

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The bank uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the bank's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. For details of the key assumptions and inputs used, refer to the individual notes addressing financial assets.

Fair value estimation

Several assets and liabilities of the bank are either measured at fair value or disclosure is made of their fair values.

Observable market data is used as inputs to the extent that it is available. Qualified external valuers are consulted for the determination of appropriate valuation techniques and inputs.

Useful lives of property and equipment

Management assess the appropriateness of the useful lives of property and equipment at the end of each reporting period. The useful lives of motor vehicles, furniture and computer equipment are determined based on bank replacement policies for the various assets. Individual assets within these classes, which have a significant carrying amount are assessed separately to consider whether replacement will be necessary outside of normal replacement parameters.

When the estimated useful life of an asset differs from previous estimates, the change is applied prospectively in the determination of the depreciation charge.

Provisions

Provisions are inherently based on assumptions and estimates using the best information available.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.3 Property and equipment

Property and equipment are tangible assets which the bank holds for its own use or for rental to others and which are expected to be used for more than one year.

An item of property and equipment is recognised as an asset when it is probable that future economic benefits associated with the item will flow to the bank, and the cost of the item can be measured reliably.

Property and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset, including the capitalisation of borrowing costs on qualifying assets and adjustments in respect of hedge accounting, where appropriate.

Expenditure incurred subsequently for major repairs, additions to or replacements of parts of property and equipment are capitalised if it is probable that future economic benefits associated with the expenditure will flow to the bank and the cost can be measured reliably. Day to day servicing costs are included in profit or loss in the year in which they are incurred.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is **charged** to write off the asset's carrying amount over its estimated useful life to its **estimated** residual value, using a method that **best** reflects the pattern in which the asset's economic benefits are consumed by the bank. Depreciation is not charged to an **asset** if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property and equipment have been assessed as follows:

Item	Depreciation method	Rate % and Method of Depreciation
Buildings	Straight line	Over the remaining lease period
Furniture and fittings	Diminishing balance	12.5
Motor vehicles	Diminishing balance	25
IT equipment	Straight line	Over three years
Leasehold improvements	Straight line	Over ten years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset

Impairment tests are performed on property and equipment when there is an indicator that they may be impaired. When the carrying amount of an item of property and equipment is assessed to be higher than the estimated recoverable amount, an impairment loss is recognised immediately in profit or loss to bring the carrying amount in line with the recoverable amount.

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

1.4 Intangible assets

An intangible asset is recognised when:

- · it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- the cost of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.4 Intangible assets (continued)

Internally generated brands, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ItemUseful lifeComputer software5 years

1.5 Financial instruments

Financial instruments held by the bank are classified in accordance with the provisions of IFRS 9 Financial Instruments.

Broadly, the classification possibilities, which are adopted by the bank ,as applicable, are as follows:

Financial assets which are debt instruments:

- Amortised cost. (This category applies only when the contractual terms of the instrument give rise, on specified
 dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held
 under a business model whose objective is met by holding the instrument to collect contractual cash flows): or
- Fair value through other comprehensive income. (This category applies only when the contractual terms of the
 instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal,
 and where the instrument is held under a business model whose objective is achieved by both collecting contractual
 cash flows and selling the instruments); or
- Designated at fair value through profit or loss. (This classification option can only be applied when it eliminates or significantly reduces an accounting mismatch).

Financial liabilities:

Amortised cost.

The specific accounting policies for the classification, recognition and measurement of each type of financial instrument held by the bank are presented below:

Debt instruments at fair value through other comprehensive income

Classification

The bank holds certain investments in bonds and debentures which are classified as subsequently measured at fair value through other comprehensive income (note 14).

They have been classified in this manner because the contractual terms of these debt instruments give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the objectives of the bank's business model is achieved by both collecting the contractual cash flows on these instruments and by selling them.

Recognition and measurement

These debt instruments are recognised when the bank becomes a party to the contractual provisions. They are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at fair value.

Even though they are measured at fair value, the bank determines the amortised cost of each instrument as if they were measured at amortised cost. The difference, at reporting date, between the amortised cost and the fair value of the debt instruments, is recognised in other comprehensive income and accumulated in equity in the reserve for valuation of investments.

The amortised cost is the amount recognised on the loan initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.5 Financial instruments (continued)

Debt instruments denominated in foreign currencies

When a debt instrument measured at fair value through other comprehensive income is denominated in a foreign currency, the amortised cost and the fair value (carrying amount) of the investment is determined in the foreign currency. The amortised cost and fair value is then translated to the Shillings equivalent using the spot rate at the end of each reporting period. Any foreign exchange gains or losses arising on the amortised cost of the instrument are recognised in profit or loss in the foreign exchange trading income. The remaining foreign exchange gains or losses relate to the valuation adjustment and are included in other comprehensive income and are accumulated in equity in the reserve for valuation of investments.

Details of foreign currency risk exposure and the management thereof are provided in the specific loan notes and in the financial risk management note (note 4).

Derecognition

Refer to the derecognition section below of the accounting policy for the policies and processes related to derecognition.

On derecognition of a debt instrument at fair value through other comprehensive income, the cumulative gain or loss on that instrument which was previously accumulated in equity in the reserve for valuation of investments is reclassified to profit or loss.

Loans and advances to customers

Classification

Loan and advances to customers are classified as financial assets and subsequently measured at amortised cost (note 20).

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the bank's business model is to collect the contractual cash flows on loan and advances to customers.

Recognition and measurement

Loan and advances to customers are recognised when the bank becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the receivable initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

Loans and advances to customers denominated in foreign currencies

When loan and advances to customers are denominated in a foreign currency, the carrying amount of the receivables are determined in the foreign currency. The carrying amount is then translated to the Shillings equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in Foreign exchange trading income.

Details of foreign currency risk exposure and the management thereof are provided in the financial risk management (note 4).

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.5 Financial instruments (continued)

Impairment

The bank recognises a loss allowance for expected credit losses on loan and advances to customers and prepayments. The amount of expected credit losses is updated at each reporting date.

The bank measures the loss allowance for loan and advances to customers which do not contain a significant financing component at an amount equal to lifetime expected credit losses (lifetime ECL). The loss allowance for all other loan and advances to customers is measured at lifetime ECL when there has been a significant increase in credit risk since initial recognition. If the credit risk on these receivables has not increased significantly since initial recognition, then the loss allowance for those receivables is measured at 12 month expected credit losses (12 month ECL).

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a loan. In contrast, 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a loan that are possible within 12 months after the reporting date.

In order to assess whether to apply lifetime ECL or 12 month ECL to loan and advances to customers which do have a significant financing component, the bank considers whether there has been a significant increase in the risk of a default occurring since initial recognition rather than at evidence of a receivable being credit impaired at the reporting date or of an actual default occurring.

Significant increase in credit risk

In assessing whether the credit risk on a receivable or group of receivables has increased significantly since initial recognition, the bank compares the risk of a default occurring as at the reporting date with the risk of a default occurring as at the date of initial recognition.

The bank considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the counterparties operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information.

Irrespective of the outcome of the above assessment, the credit risk on a receivable is always presumed to have increased significantly since initial recognition if the contractual payments are more than 30 days past due, unless the bank has reasonable and supportable information that demonstrates otherwise.

By contrast, if a receivable is assessed to have a low credit risk at the reporting date, then it is assumed that the credit risk has not increased significantly since initial recognition.

The bank regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increases in credit risk before the amount becomes past due.

Definition of default

For purposes of internal credit risk management purposes, the bank consider that a default event has occurred if there is either a breach of financial covenants by the counterparty, or if internal or external information indicates that the counterparty is unlikely to pay its creditors in full (without taking collateral into account).

Irrespective of the above analysis, the bank considers that default has occurred when a receivable is more than 90 days past due unless there is reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.5 Financial instruments (continued)

Measurement and recognition of expected credit losses

The bank makes use of a provision matrix as a practical expedient to the determination of expected credit losses on loan and advances to customers. The provision matrix is based on historic credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current and forecast direction of conditions at the reporting date, including the time value of money, where appropriate.

An impairment gain or loss is recognised in profit or loss with a corresponding adjustment to the carrying amount of loan and advances to customers, through use of a loss allowance account. The impairment loss is included in Impairment losses on loans and advances in profit or loss as a movement in credit loss allowance (note 10).

Write off policy

The bank writes off a receivable when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Receivables written off may still be subject to enforcement activities under the bank recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

Credit risk

Details of credit risk are included in the loan and advances to customers note (note 20) and the financial risk management note (note 4).

Derecognition

Refer to the derecognition section below of the accounting policy for the policies and processes related to derecognition.

Customer deposits

Classification

Customer deposits (note 26) and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

They are recognised when the bank becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

Customer deposits expose the bank to liquidity risk and possibly to interest rate risk. Refer to note 4 for details of risk exposure and management thereof.

Customer deposits denominated in foreign currencies

When customer deposits are denominated in a foreign currency, the carrying amount of the payables are determined in the foreign currency. The carrying amount is then translated to the Shillings equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the foreign exchange trading income.

Details of foreign currency risk exposure and the management thereof are provided in the financial risk management note (note 4).

Derecognition

Refer to the derecognition section below of the accounting policy for the policies and processes related to derecognition.

Cash and cash equivalents

Cash and cash equivalents are stated at carrying amount which is deemed to be fair value.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.5 Financial instruments (continued)

Derecognition

Financial assets

The bank derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the bank neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the bank recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the bank retains substantially all the risks and rewards of ownership of a transferred financial asset, the bank continues to recognise the financial asset.

Financial liabilities

The bank derecognises financial liabilities when, and only when, the bank obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Reclassification

Financial assets

The bank only reclassifies affected financial assets if there is a change in the business model for managing financial assets. If a reclassification is necessary, it is applied prospectively from the reclassification date. Any previously stated gains, losses or interest are not restated.

The reclassification date is the beginning of the first reporting period following the change in business model which necessitates a reclassification.

Financial liabilities

Financial liabilities are not reclassified.

1.6 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the **deferred** tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income, or
- a business combination.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.6 Tax (continued)

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.7 Leases

The bank assesses whether a contract is, or contains a lease, at the inception of the contract.

A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the bank has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

In circumstances where the determination of whether the contract is or contains a lease requires significant judgment, the relevant disclosures are provided in the significant judgments and sources of estimation uncertainty section of these accounting policies.

Bank as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the bank is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the bank recognises the lease payments as an operating expense (note) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated to each lease component on the basis of the relative stand-alone prices of the lease components and the aggregate stand-alone price of the non-lease components (where non-lease components exist).

However as an exception to the preceding paragraph, the bank has elected not to separate the non-lease components for leases of land and buildings.

Details of leasing arrangements where the bank is a lessee are presented in note 22 Leases (bank as lessee).

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the bank uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the bank under residual value guarantees;
- the exercise price of purchase options, if the bank is reasonably certain to exercise the option;
- · lease payments in an optional renewal period if the bank is reasonably certain to exercise an extension option; and
- penalties for early termination of a lease, if the lease term reflects the exercise of an option to terminate the lease.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability (or right-of-use asset). The related payments are recognised as an expense in the period incurred and are included in operating expenses (note 22).

The lease liability is presented as a separate line item on the Statement of Financial Position.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.7 Leases (continued)

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance costs (note 11).

The bank remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change in the assessment of whether the bank will exercise a purchase, termination or extension
 option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised
 discount rate:
- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);
- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;
- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which
 case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Lease payments included in the measurement of the lease liability comprise the following:

- the initial amount of the corresponding lease liability;
- · any lease payments made at or before the commencement date;
- · any initial direct costs incurred;
- any estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on
 which it is located, when the bank incurs an obligation to do so, unless these costs are incurred to produce
 inventories; and
- · less any lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the bank expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

For right-of-use assets which are depreciated over their useful lives, the useful lives are presented in the following table:

 Item
 Average useful life and depreciation method

 Leased premises
 Over the remaining lease preiod

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate. Each part of a right-of-use asset with a cost that is significant in relation to the total cost of the asset is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

1.8 Leases (Comparatives under IAS 17)

A lease is **classified** as a finance lease if it transfers substantially all the risks and **rewards** incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.8 Leases (Comparatives under IAS 17) (continued)

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted.

Any contingent rents are expensed in the period they are incurred.

1.9 Identification and measurement of impairment of financial assets

At each reporting date the bank assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows on the asset than can be estimated reliably.

The bank considers evidence of impairment at both a specific asset and collective level. All individually significant financial assets are assessed for specific impairment. All significant assets found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Assets that are not individually significant are collectively assessed for impairment by grouping together financial assets (carried at amortised cost) with similar risk characteristics.

Objective evidence that financial assets are impaired can include default or delinquency by a borrower, restructuring of a loan or advance by the bank on terms that the bank would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group.

In assessing collective impairment, the bank uses statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rate, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount.

When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

1.10 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instrument.

1.11 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.11 Employee benefits (continued)

Retirement benefit costs

The bank operates a defined contribution staff retirement benefit scheme for its permanent and pensionable employees. The scheme is administered by an insurance company. The bank has no further payment obligations once the contributions have been paid. The company's obligations to the schemes are recognised in the Statement of Profit or Loss and Other Comprehensive income.

The bank and its employees also contribute to the National Social Security Fund (NSSF), a national defined contribution scheme. Contributions are etermined by local stature and the bank's contributions are charged to the Statement of Profit or Loss and Other Comprehensive Income in the year they fall due.

Employee entitlements

Employee entitlements to gratuity and long term service awards are recognised when they accrue to employees. A provision is made for the estimated liability for such entitlements as a result of services rendered by employees up to the statement of financial position date.

The estimated monetary liability for employee's accrued annual leave entitlement at the reporting date is recognised as an expense accrual.

1.12 Provisions and contingencies

Provisions are recognised when:

- · the bank has a present obligation as a result of a past event;
- · it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 35.

1.13 Revenue recognition

Revenue is derived substantially from banking business and related activities and comprises net interest income and non-interest income. Income is recognised on an accrual basis in the period in which it is earned.

(i) Interest and similar income and expense

Under IFRS 9, interest income is recorded using the effective interest rate (EIR) method for all financial instruments measured at amortised cost and financial instruments designated at FVPL. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk, the adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the statement of financial position with an increase or reduction in interest income. The adjustment is subsequently amortised through Interest and similar income in profit or loss.

The Bank calculates interest income by applying the EIR to the gross carrying amount of financial assets other than creditimpaired assets.

When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.13 Revenue recognition (continued)

Interest income and expense are recognised in profit or loss on the accrual basis. Interest income and expense presented in the statement of profit or loss and other comprehensive income include interest on financial assets and financial liabilities measured at amortised cost calculated on an effective interest basis.

(ii) Fees and commission income

Fees and commission income is recognised on an accrual basis when the service is provided. This income comprises appraisal and facility fees charged on advances, commissions charged on use of channels and ledger fees levied on current and savings accounts.

(iii) Foreign exchange trading income

Foreign exchange trading income comprises gains less losses related to trading assets and liabilities and includes all realized and unrealized exchange gains or losses.

1.14 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Shillingss, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual report and financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Shillingss by applying to the foreign currency amount the exchange rate between the Shillings and the foreign currency at the date of the cash flow.

1.15 Impairment for non-financial assets

The carrying amounts of the bank's non-financial assets, other than deferred tax, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the assets' recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that largely are independent from other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cashgenerating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro-rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Annual Report And Financial Statements for the year ended December 31, 2019

Accounting Policies

1.16 Dividends

Proposed dividends are disclosed as a separate component of equity until declared.

Dividends are recognised as a liabilities in the period in which they are approved by the bank's shareholders.

1.17 Contingent liabilities

Letters of credit, acceptances, guarantees and performance bonds are accounted for as off balance sheet transactions and disclosed as contingent liabilities. Estimates of the outcome and of the financial effect of contingent liabilities is made by the management based on the information available up to the date the financial statements are approved for issue by the Directors. Any expected loss is charged to profit or loss.

1.18 Statutory loan loss reserve

These are provisions that have been appropriated from Retained Earnings. This applies if provisions computed under the Risk Classification of Assets and Provisioning Guidelines is in excess of impairment losses computed under the International Financial Reporting Framework.

1.19 Interest expense

Interest for all interest-bearing financial liabilities is recognised within interest expense in profit or loss using the effective interest method.

Interest expense includes expense incurred on customer deposits, placements and overnight borrowings with other banking institutions.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

2. New Standards and Interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the bank has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Plan Amendment, Curtailment or Settlement - Amendments to IAS 19

The amendment deals with the determination of past service cost and gains or losses on settlement, when a plan is amended, curtailed or settled ("the event"). Specifically, when determining the past service cost or gain or loss on settlement, the net defined benefit liability (asset) shall be remeasured using the current fair value of plan assets and current actuarial assumptions reflecting the benefits offered under the plan and plan assets both before and after the event. The effect of the asset ceiling shall not be considered in this exercise. The effect of the asset ceiling shall be determined after the event.

The amendment also specifies that when determining current service costs and net interest on the defined benefit liability (asset) in a period in which an amendment, curtailment or settlement occurs, to apply inputs at the beginning of the reporting period for the current service cost and interest up to the date of the event, and to apply inputs as at the date of the event to determine current service costs and interest for the remainder of the period.

The effective date of the amendment is for years beginning on or after January 01, 2019.

Prepayment Features with Negative Compensation - Amendment to IFRS 9

The amendment to Appendix B of IFRS 9 specifies that for the purpose of applying paragraphs B4.1.11(b) and B4.1.12(b), irrespective of the event or circumstance that causes the early termination of the contract, a party may pay or receive reasonable compensation for that early termination.

The effective date of the amendment is for years beginning on or after January 01, 2019.

Amendments to IFRS 3 Business Combinations: Annual Improvements to IFRS 2015 - 2017 cycle

The amendment clarifies that when a party to a joint arrangement obtains control of a business that is a joint operation, and had rights to the assets and obligations for the liabilities relating to that joint operation immediately before the acquisition date, the transaction is a business combination achieved in stages. The acquirer shall therefore apply the requirements for a business combination achieved in stages.

The effective date of the amendment is for years beginning on or after January 01, 2019.

Amendments to IAS 12 Income Taxes: Annual Improvements to IFRS 2015 - 2017 cycle

The amendment specifies that the income tax consequences on dividends are recognised in profit or loss, other comprehensive income or equity according to where the entity originally recognised the events or transactions which generated the distributable reserves.

The effective date of the amendment is for years beginning on or after January 01, 2019.

Uncertainty over Income Tax Treatments

The interpretation clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. Specifically, if it is probable that the tax authorities will accept the uncertain tax treatment, then all tax related items are measured according to the planned tax treatment. If it is not probable that the tax authorities will accept the uncertain tax treatment, then the tax related items are measured on the basis of probabilities to reflect the uncertainty. Changes in facts and circumstances are required to be treated as changes in estimates and applied prospectively.

The effective date of the interpretation is for years beginning on or after January 01, 2019.

The bank expects to adopt the interpretation for the first time in the 2019 annual report and financial statements.

The impact of the interpretation is not material.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

2. New Standards and Interpretations (continued)

IFRS 16 Leases

IFRS 16 Leases is a new standard which replaces IAS 17 Leases, and introduces a single lessee accounting model. The main changes arising from the issue of IFRS 16 which are likely to impact the bank are as follows:

Bank as lessee:

- Lessees are required to recognise a right-of-use asset and a lease liability for all leases, except short term leases or leases where the underlying asset has a low value, which are expensed on a straight line or other systematic basis.
- The cost of the right-of-use asset includes, where appropriate, the initial amount of the lease liability; lease
 payments made prior to commencement of the lease less incentives received; initial direct costs of the lessee; and
 an estimate for any provision for dismantling, restoration and removal related to the underlying asset.
- The lease liability takes into consideration, where appropriate, fixed and variable lease payments; residual value guarantees to be made by the lessee; exercise price of purchase options; and payments of penalties for terminating the lease.
- The right-of-use asset is subsequently measured on the cost model at cost less accumulated depreciation and impairment and adjusted for any re-measurement of the lease liability. However, right-of-use assets are measured at fair value when they meet the definition of investment property and all other investment property is accounted for on the fair value model. If a right-of-use asset relates to a class of property, plant and equipment which is measured on the revaluation model, then that right-of-use asset may be measured on the revaluation model.
- The lease liability is subsequently increased by interest, reduced by lease payments and re-measured for reassessments or modifications.
- Re-measurements of lease liabilities are affected against right-of-use assets, unless the assets have been reduced to nil. in which case further adjustments are recognised in profit or loss.
- The lease liability is re-measured by discounting revised payments at a revised rate when there is a change in the lease term or a change in the assessment of an option to purchase the underlying asset.
- The lease liability is re-measured by discounting revised lease payments at the original discount rate when there is a change in the amounts expected to be paid in a residual value guarantee or when there is a change in future payments because of a change in index or rate used to determine those payments.
- Certain lease modifications are accounted for as separate leases. When lease modifications which decrease the
 scope of the lease are not required to be accounted for as separate leases, then the lessee re-measures the lease
 liability by decreasing the carrying amount of the right of lease asset to reflect the full or partial termination of the
 lease. Any gain or loss relating to the full or partial termination of the lease is recognised in profit or loss. For all
 other lease modifications which are not required to be accounted for as separate leases, the lessee re-measures the
 lease liability by making a corresponding adjustment to the right-of-use asset.
- Right-of-use assets and lease liabilities should be presented separately from other assets and liabilities. If not, then
 the line item in which they are included must be disclosed. This does not apply to right-of-use assets meeting the
 definition of investment property which must be presented within investment property. IFRS 16 contains different
 disclosure requirements compared to IAS 17 leases.

Bank as lessor:

- Accounting for leases by lessors remains similar to the provisions of IAS 17 in that leases are classified as either finance leases or operating leases. Lease classification is reassessed only if there has been a modification.
- A modification is required to be accounted for as a separate lease if it both increases the scope of the lease by
 adding the right to use one or more underlying assets; and the increase in consideration is commensurate to the
 stand alone price of the increase in scope.
- If a finance lease is modified, and the modification would not qualify as a separate lease, but the lease would have been an operating lease if the modification was in effect from inception, then the modification is accounted for as a separate lease. In addition, the carrying amount of the underlying asset shall be measured as the net investment in the lease immediately before the effective date of the modification. IFRS 9 is applied to all other modifications not required to be treated as a separate lease.
- Modifications to operating leases are required to be accounted for as new leases from the effective date of the modification. Changes have also been made to the disclosure requirements of leases in the lessor's financial statements.

Sale and leaseback transactions:

In the event of a sale and leaseback transaction, the requirements of IFRS 15 are applied to consider whether a
performance obligation is satisfied to determine whether the transfer of the asset is accounted for as the sale of an
asset.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

2. New Standards and Interpretations (continued)

- If the transfer meets the requirements to be recognised as a sale, the seller-lessee must measure the new right-of-use asset at the proportion of the previous carrying amount of the asset that relates to the right-of-use retained. The buyer-lessor accounts for the purchase by applying applicable standards and for the lease by applying IFRS 16
- If the fair value of consideration for the sale is not equal to the fair value of the asset, then IFRS 16 requires adjustments to be made to the sale proceeds. When the transfer of the asset is not a sale, then the seller-lessee continues to recognise the transferred asset and recognises a financial liability equal to the transfer proceeds. The buyer-lessor recognises a financial asset equal to the transfer proceeds.

The effective date of the standard is for years beginning on or after January 01, 2019.

The bank has adopted the standard for the first time in the 2019 annual report and financial statements.

The impact of the standard is set out in note 3 Changes in Accounting Policy.

2.2 Standards and interpretations not yet effective

The bank has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the bank's accounting periods beginning on or after January 01, 2020 or later periods:

Definition of a business - Amendments to IFRS 3

The amendment:

- confirmed that a business must include inputs and a processes, and clarified that the process must be substantive
 and that the inputs and process must together significantly contribute to creating outputs.
- narrowed the definitions of a business by focusing the definition of outputs on goods and services provided to
 customers and other income from ordinary activities, rather than on providing dividends or other economic benefits
 directly to investors or lowering costs; and
- added a test that makes it easier to conclude that a company has acquired a group of assets, rather than a
 business, if the value of the assets acquired is substantially all concentrated in a single asset or group of similar
 assets.

The effective date of the amendment is for years beginning on or after January 01, 2020.

The bank expects to adopt the amendment for the first time in the 2020 annual report and financial statements.

It is unlikely that the amendment will have a material impact on the bank's annual report and financial statements.

Presentation of Financial Statements: Disclosure initiative

The amendment clarify and align the definition of 'material' and provide guidance to help improve consistency in the application of that concept whenever it is used in IFRS Standards.

The effective date of the amendment is for years beginning on or after January 01, 2020.

The bank expects to adopt the amendment for the first time in the 2020 annual report and financial statements.

It is unlikely that the amendment will have a material impact on the bank's annual report and financial statements.

Accounting Policies, Changes in Accounting Estimates and Errors: Disclosure initiative

The amendment clarify and align the definition of 'material' and provide guidance to help improve consistency in the application of that concept whenever it is used in IFRS Standards.

The effective date of the amendment is for years beginning on or after January 01, 2020.

The bank expects to adopt the amendment for the first time in the 2020 annual report and financial statements.

It is unlikely that the amendment will have a material impact on the bank's annual report and financial statements.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

3. Changes in accounting policy

The annual report and financial statements have been prepared in accordance with International Financial Reporting Standards on a basis consistent with the prior year except for the adoption of the following new or revised standards.

Application of IFRS 16 Leases

In the current year, the Company have applied IFRS 16 Leases which replaces IAS 17 leases and three interpretations namely, IFRIC 4 'Determining whether an arrangement contains a lease', SIC 15 'Operating lease incentives' and SIC 27 'Evaluating the substance of transactions involving the legal form of a lease'.

On transition, for leases previously accounted for as operating leases with a remaining lease term of less than 1 year and for leases with low value, the Company has applied the optional exemption to account for the lease expense on a straight line basis over the remaining lease term.

For leases previously classified as finance lease, the right of use asset and lease liability are measured at the date of initial application at the same amounts as under IAS 17 immediately before the date of initial application.

On transition to IFRS 16, the weighted average incremental borrowing rate applied to lease liabilities recognised under IFRS 16 was 13.50%.

Refer to note 22 for Right of use assets recognised and note 31 for lease liabilities.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

4. Financial instruments and risk management

Financial risk management

Overview

The bank's activities exposes it to a variety of financial risks and those activities involve analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The bank's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the bank's financial performance

The bank's risk management policies are established to identify and analyse the risks faced by the bank, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the bank's activities.

Risk management function is carried out by the bank's risk management department under policies approved by the Board of Directors. The bank's risk management department identifies, measures, monitors and controls financial risks in close coordination with various other departmental heads. The bank has Board approved policies covering specific areas, such as credit risk, market risk, liquidity risk and operational risk.

The most important types of risk are credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate risk and price risk.

Capital management

The bank's objectives when managing capital, which is a broader concept than the equity on the face of the statement of financial position are:

- To comply with the capital requirements set by the regulator, Central Bank of Kenya.
- To safeguard the bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders
- To maintain a strong capital base to support the development of its business.

The bank monitors the adequacy of its capital using ratios established by Central Bank of Kenya. These ratios measure capital adequacy by comparing the bank's core capital with total risk-weighted assets plus risk weighed off-balance sheet items, total deposit liabilities and total risk-weighted off balance sheet items.

Credit risk weighted assets

Assets are weighted according to broad categories of notional credit risk, being assigned a risk weighting according to the amount of capital deemed to be necessary to support them. Four categories of risk weightage (0%, 20%, 50% and 100%) are applied e.g. cash in hand (domestic and foreign), balances held with Central Bank of Kenya including securities issued by the Government of Kenya have a zero risk weighting, which means that no capital is required to support the holding of these assets. Property, plant and equipment carries a 100% risk weighting. Based on these guidelines it means that they must be supported by capital equal to 100% of the carrying amount. Other asset categories have intermediate weightings.

Off-balance sheet credit related commitments such as guarantees and acceptances, performance bonds, documentary credit e.t.c. are taken into account by applying different categories of credit risk conversion factors, designed to convert these items into balance sheet equivalents. The resulting credit equivalent amounts are then weighted for credit risk using the same percentages as for statement of financial position assets. Core capital (Tier 1) consists of paid-up share capital, retained profits less non-dealing investments. Supplementary capital (Tier 2) includes statutory loan loss provisions and non-dealing investments.

Market risk weighted assets

This is the risk of loss in on and off balance sheet position arising from movement in market prices. These risks pertain to inherent risk related instruments in the trading book, commodities risk throughout the bank, equities risk and foreign exchange risk in the trading and banking books of the bank. Different risk weights are applied as per the Prudential Regulation.

Notes to the Annual Report And Financial Statements

Financial instruments and risk management (continued)

Operational risk weighted assets

This is the risk of loss resulting from inadequate or failed internal process, people or from external events. The operational risk is calculated using the Basic Indicator Approach. Under this approach, the capital charge for operational risk is a fixed percentage of average positive annual gross income of the institution over the past three years. Annual gross income is the sum of net interest income and net non interest income.

The table below summarizes the composition of the regulatory capital. The figures below are in Ksh ('000).

	Balance sheet nominal amount		Risk weighted amount	
	2019	2018	2019	2018

Core capital to deposit liabilities	19.32 %	20.54 %	8.00 %	8.00 %

Credit risk

The bank takes on exposure to credit risk, which is the risk that a customer will cause a financial loss for the bank by failing to fulfil a contractual obligation. Credit risk is the most important risk for the bank's business. Management therefore carefully manages its exposure to credit risk. Credit risk mainly arises from customer loans and advances, credit cards, investing activities and loan commitments (off balance sheet financial instruments).

The credit risk management and control are centralised in credit and treasury departments of the bank.

In measuring credit risk of loans and advances to customers, the bank reflects on various components. These include:

- the probability of default by the borrower/client on their contractual obligations;
- current exposures on the borrower/client and the likely future development, from which the bank derives the
 exposure at default; and
- the likely recovery ratio on the defaulted obligations.

These credit risk measurements, which reflect expected loss, are embedded in the bank's daily operational management. The operational measurements can be contrasted with impairment allowances required under IFRS 9 and the Banking Act which are based on losses that have been incurred at the date os the statement of financial position rather than expected loss.

The bank assesses the probability of default of individual borrower/client using internal rating methods tailored to the various categories of the borrower/client. These have been developed and combine statistical analysis with the credit department's judgement and are validated, where appropriate, by comparison with externally available data.

Management assesses the credit quality of the customer, taking into account their financial position, past experience and other factors.

Individual limits are set based on internal or external information in accordance with limits set by the management. The utilisation of credit limits is regularly monitored. Corrective action is taken where necessary.

For investments, internal ratings taking into account the requirements of the Banking Act are used by the bank for managing the credit risk exposures. The investments in those securities are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirement at the same time.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

The bank manages, limits and controls concentrations of credit risk wherever they are identified. The bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to industry segments. Such risks are monitored on a revolving basis and subject to annual or more frequent review, when considered necessary. Limits on the level of credit risk by product and industry sector are approved as and when required by the credit committee.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by charging these lending limits where appropriate.

Some other specific control and mitigation measures are outlined below:

The bank employs a range of policies and practices to mitigate credit risk. The most common one is to obtain collateral for loans and advances to customers. The types of collateral obtained include:

- Mortgages over properties;
- Charges over business assets such as land and buildings, inventory and receivables;
- · Charges over financial instruments such as investments;
- Deposits placed under lien.

- Credit-related committments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and letters of credit carry the same credit risk as loans. Letters of credit (which are written undertakings by the bank on behalf of a customer authorising a third party to draw drafts on the bank up to a stipulated amount under specific terms and conditions) are collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than a direct advance or loan.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

- Impairment and provisioning policies

The bank's internal and external systems focus more on credit quality mapping from the inception of the lending of the loan or advance. In contrast, impairment provisions are recognised for financial reporting purposes only for losses that have been incured at the statement of financial position date based on objective evidence of impairment.

The impairment provision shown in the statement of financial position at the year-end is derived after taking various factors into consideration as described in the accounting policy. The bank's management uses basis under IFRS 9 and the Prudential Guidelines to determine the amount of impairment.

Exposure to credit risk

The management is confident in its ability to continue to control and sustain minimal exposure of credit risk to the bank resulting from both its loan and advances portfolio and other financial assets based on the following:

- The maximum exposure to credit risk arises from investments in government securities which form 53.55% (2018: 49.42%) of total assets; 32.76% (2018: 33.79%) represents loans and advances to customers.
- Government securities are considered stable investments as the risk is considered negligible.
- Share of Normal and Watch Accounts 91.76% (2018: 91.16%) of the loans and advances portfolio is categorised in the top two grades of the internal rating system (Normal and Watch).
- 20.54% (2018: 27.15%) of the loans and advances portfolio are considered to be past due but not impaired.
- Most of its loans and advances to customers are performing as per the respective covenants. Non-performing loans and advances have been provided for. The loans and advances are also secured.
- Cash in hand, balances with Central Bank of Kenya and placements with other banking institutions are held with sound financial institutions.
- · Management considers the historical information available to assess the credit risk on investment securities,

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

Exposure to this risk has been quantified in each financial asset note in the financial statements along with any concentration of risk.

Liquidity risk

Liquidity risk is the risk that the bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are overdrawn.

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the bank. It is unusual for banks ever to be completely matched since business transacted is often of uncertain terms and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The maturity of assets and liabilities and the ability to replace, at an acceptable cost, interest bearing liabilities as they mature are important factors in assessing the iquidity of the bank and its exposure to changes in interest and exchange rates.

The bank does not maintain cash resources to meet all liabilities as they fall due as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainity. The management has set limits on the minimum portion of maturing funds available to meet such withdrawals and on the level of interbank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand. The management reviews the maturity profile on a weekly basis and ensures that sifficient liquidity is maintained to meet maturing deposits which substantially are generally rolled over into new deposits. The bank fully complies with the Central Bank of Kenya's minimum cash reserve ratio (5.25%) and liquidity ratio (20%) requirements, with the average liquidity maintained at 78.4% (2018: 78.2%) during the year.

Notes to the Annual Report And Financial Statements

The table below analyses the bank's financial assets and liabilities into the relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date.

At December 31, 2019

Experience indicates that customer deposits are maintained for longer periods than the contractual maturity dates. The deposit base is considered to be of a stable and long term nature.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

Interest rate risk

The bank's operations are subject to the risk of interest rate fluctuations to the extent that interest earning assets and interest bearing liabilities mature or reprice at different times or in differing amounts. Risk management activities are aimed at optimizing net interest income, given market interest rates levels consistent with the bank's business strategies. The bank is exposed to various risks associated with the effects of fluctuation in the prevailing levels of market interest rates on its financial position and cash flows. The management closely monitors the interest rate trends to minimise the potential adverse impact of interest rate changes. The table summarises the exposure to interest rate risk at the balance sheet date. Included in the table are the assets and liabilities at carrying amounts, categorised by the earlier of contractual repricing or maturity dates. The bank does not have any derivative financial instruments. The bank does not bear an interest rate risk on off balance sheet items.

Cash flow interest rate risk

The tables below summarise the effective interest rates calculated on a weighted average basis, by major currencies for monetary financial assets and liabilities:

2019 Government securities Placements with other banks Loans and advances to customers Customer deposits Placements from other banks		Ksh 12.39 % 6.86 % 13.19 % 7.56 % 4.23 %	- % - % 9.34 % 0.92 % - %	GBP - % - % 5.97 % 2.90 % - %	Euro - % - % 6.74 % - %
2018 Government securities Placements with other banks Loans and advances to customers Customer deposits Placements from other banks	The state of the s	Ksh 12.34 % 8.21 % 13.73 % 6.85 % 2.42 %	- % - % 9.79 % 1.09 % - %	GBP - % - % 5.83 % 2.19 % - %	Euro - % - % 6.89 % 0.21 % - %

Interest rate risk sensitivity

At 31 December 2019, if the weighted average interest had been 10% higher, with all other variables held constant, post-tax profit would have been as follows:

Figures in Kenyan Shilling ('000)	2019	2018
Effect on interest income - increase Effect in interest expense - (increase)	964,967 (493,463)	819,185 (368,578)
Net effect on profit after tax - increase	471,504	450,607

Currency risk

The bank operates wholly within Kenya and its assets and liabilities are reported in the local currency. It conducts trade with correspondant banks and takes deposits and lends in other currencies. The bank's currency position and exposure are managed within the exposure guideline of 10% of the core capital as stipulated by the Central Bank of Kenya. The position is reviewed on a daily basis by management.

Market risk

Total liabilities and equity

Net statement of financial position gap

Market risk is the risk that changes in the market prices, which includes currency exchange rate and interest rates, will affect the fair value or future cash flows of financial instruments. Market risk arises from open positions in interest rates and foreign currencies, both of which are exposed to general and specific market movements and changes in the level of volatility. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while optimising on the return on risk. Overall management for management of market risk rests with the Assets & Liability Committee (ALCO).

13,089,086

(117, 258)

7,249,833

(8,012)

203,445

(21, 162)

81,464,467 102,006,831

(38,430,679)

(38, 284, 247)

The treasury department is responsible for the development of detailed risk management policies, subject to review and approval by ALCO, and for the day to day implementation of the policies.

Market risks arise mainly from trading and non-trading activities.

Trading portfolios include those positions arising from market-making transactions where the bank acts as a principal with clients or with the market.

Non-trading portfolios primarily arise from the interest rate management of the entity's retail and commercial banking assets and liabilities. Non-trading portfolios also consist of foreign exchange and equity risks arising from the bank's investments.

The major measurement techniques used to measure and control market risk are outlined below:

- ALCO review

ALCO meets on a monthly basis to review the following:

- A summary of the bank's aggregate exposure on market risk
- A summary of the bank's maturity/repricing gaps
- A report indicating that the bank is in compliance with the board's set exposure limit
- A comparison of past forecast or risk estimates with actual results to identify any shortcomings.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

- Review by the treasury department

The treasury department monitors foreign exchange risk in close collaboration with the management. Regular reports are prepared by the treasury department of the bank and discussed with the management. Some of these reports include:

- Net overnight positions by currency
- · Maturity distribution by currency of the assets and liabilities for both on and off balance sheet items
- · Outstanding contracts (if any) by settlement date and currency
- Total values of contracts, spots and futures
- Aggregate dealing limits
- Exception reports for example limits or line excesses.

Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the bank's processes, personnel, technology and infrastructure and from external factors other than credit, market and liquidity risks such as those arising out of legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risk arise from the bank's operations and is faced by all other business entities.

The bank endeavors to manage the operational risk by creating a balance between avoidance of cost of financial losses and damage to the bank's reputation within overall cost effectiveness and to avoid control procedures that restrict creativity and initiative. The key responsibility for development and implementation of policies and programs to implement the bank's operational risk management is with the senior management of the bank.

The above management of operational risk is to be achieved by development of overall standards for the bank to manage the risk in the following areas:

- Segregation of duties including independent authorisation of transactions
- Monitoring and reconciliation of transactions
- · Compliance of regulatory and legal requirement
- · Documentation of control and procedure
- · Assessment of the operational risk on a periodic basis to address the deficiencies observed, if any
- · Reporting of operational losses and initiation of remedial action
- · Development of contingency plan
- Giving training to staff to improve their professional competency
- Ethical and business standards
- Obtaining insurance wherever feasible, as a risk mitigation measure.

Risk measurement and control

Interest rate, currency, credit, liquidity and other risks are actively managed by management to ensure compliance with the bank's risk limits. The bank's risk limits are assessed regularly to ensure their appropriateness given its objectives and strategies and current market conditions. A variety of techniques are used by the bank in measuring the risks inherent in its trading and non-trading positions.

Notes to the Annual Report And Financial Statements

Figures in Kenyan Shilling ('000)	2019	2018
16. Balance with Central Bank of Kenya		
Balances with Central Bank of Kenya	7,463,134	5,905,928
The cash reserve ratio balance is non interest bearing and is based on the value accordance with Central Bank of Kenya requirements. As at December 31, 2019 the cas (2018: 5.25%) of all customer deposits. These funds are not available for the bank's day	h reserve ratio requiren	
- Cash reserve ratio - Other	7,259,030 204,104	5,763,918 142,010

Exposure to credit risk

Balances with Central Bank of Kenya inherently expose the bank to credit risk, being the risk that the bank will incur financial loss if counterparties fail to make payments as they fall due.

7,463,134

5.905.928

Exposure to currency risk

Refer to note 4 Financial risk management for details of currency risk management for Balances with Central Bank of Kenya.

17. Government securities

Available-for-sale Treasury bonds	28,451,626	10,927,394

Held to maturity		
Treasury bonds	45,375,133	46,051,100
Treasury bills	2,916,858	3,810,164
	48,291,991	49,861,264
Total government securities	76,743,617	60,788,658
Current assets		
Fair value through other comprehensive income	28,451,626	10,927,394
Amortised cost	48,291,991	49,861,264
	76,743,617	60,788,658
Government securities comprise of:		
Maturing within 91 days	3,031,958	2,188,946
Maturing within 91 days and within an year	4,421,077	9,367,937
Maturing after an year	15,269,474	14,198,894
Maturing after three years	54,021,108	35,032,881
	76,743,617	60,788,658

The fair values of the government securities classified as 'Fair value through other comprehensive income' financial assets are categorised under Level 1 based on the information set out in the accounting policy.

There were no gains or losses realised on the disposal of amortised cost financial assets in 2019 and 2018, as all the financial assets were disposed of at their redemption date.

Exposure to credit risk

Government securities inherently expose the bank to credit risk, being the risk that the bank will incur financial loss if counterparties fail to make payments as they fall due.

Exposure to currency risk

Refer to note 3 Financial risk management for details of currency risk management for Government securities.

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

Figures in Kenyan Shilling ('000)	2019	2018

17. Government securities (continued)

There were no gains or losses realised on the disposal of held to maturity financial assets in 2019 and 2018, as all the financial assets were disposed of at their redemption date.

18. Placements with other banks

Placements with banking institutions in Kenya	1,389	349,789
Placements with banking institutions abroad	9,766,381	12,659,685
Placements with parent bank	187,768	2,707
	9,955,538	13,012,181

Exposure to credit risk

Placements with other banks inherently expose the bank to credit risk, being the risk that the bank will incur financial loss if counterparties fail to make payments as they fall due.

Exposure to currency risk

Refer to note 4 Financial risk management for details of currency risk management for placements with other banks.

19. Other assets

Items in transit Other receivables and prepayments	228,976 398,939	340,073 248,444
	627,915	588,517

In the opinion of the management, the bank's exposure to credit risk from other assets is low as these are expected to be collected within no more than 12 months after the date of this report.

20. Loan and advances to customers

Financial instruments:		
Overdrafts	22.317.305	20.571,313
Commercial loans	27,607,457	23,463,183
Bills	127,133	139,361
Gross loans and advances	50,051,895	44,173,857
Provision for impaired loans and advances	(2,871,383)	(2,367,993)
Interest in suspense	(238,532)	(235,016)
Net loans and advances	46,941,980	41,570,848
Provision for impaired loans and advances		
At start of the year	2,367,993	1,545,448
Additional provision during the year	773,408	938,150
Provision utilised during the year for write off	1/22	(911)
Recoveries	(270,018)	(114,694)
At year end	2,871,383	2,367,993

Loans and advances have been written down to their recoverable amount. Non performing loans and advances on which provisions for impairment have been recognised amount to Ksh 4.126 billion (2018: Ksh 3.903 billion). These are included in the statement of financial position net of provisions at Ksh 1.016 billion (2018: Ksh 1.3 billion). In the opinion of the Directors, sufficient securities are held to cover the exposure on such loans and advances. Interest income amounting to Ksh 238.53 million (2018: Ksh 235.02 million) on impaired loans and advances has not been recognised as the management feels no economic benefit of such interest will flow to the bank.

Gross loans and advances to customers

50,051,891

44,173,857

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

Figures in Kenyan Shilling ('000)	2019	2018
20. Loan and advances to customers (continued)		
Less: Provision for impaired loans and advances and suspended interest	(3,109,914)	(2,603,009)
	(3,109,914)	(2,603,009)
Net loans and advances to customers	46,941,977	41,570,848

The loans and advances past due but not impaired are aged between 30 to 90 days. Loans and advances that are aged past 180 days are considered impaired.

The credit quality of the portfolio of loans and advances that were past due but not impaired can be assessed by reference to the internal rating system adopted by the bank. The loans and advances past due but not impaired can be analysed as follows:

Watch 7,826,318 8,599,686

The fair value of the collateral for loans and advances past due but not impaired is considered adequate.

Loans and advances individually impaired

The fair value of the collateral for loans and advances individually impaired is Ksh 1,733.47 million (2018: Ksh 2,034.927 million).

Loans and advances renegotiated

Restructuring activities include extended payment arrangements, approved external management plans, modification and deferral of payments. Following restructuring, a previously overdue customer account is reset to a substandard status and managed together with other similar accounts. Restructuring policies and practices are based on indicators or criteria which, in the judgement of the credit committee indicate that payment will most likely continue. These policies are kept under continuous review.

Repossessed collateral

As at the year end the bank did not hold possession of any repossessed collateral held as security.

Exposure to credit risk

Loans and receivables inherently expose the bank to credit risk, being the risk that the bank will incur financial loss if customers fail to make payments as they fall due.

The bank's historical credit loss experience does not show significantly different loss patterns for different customer segments. The provision for credit losses is therefore based on past due status without disaggregating into further risk profiles.

Exposure to currency risk

Refer to note for details of currency risk management for loans and advances.

	117,173,439	100	101,958,341	100

Included in customer accounts were deposits of Ksh 5,416.15 million (2018: Ksh 3,715.22 million) collateral for loans and advances. The fair value of those deposits approximates the cerrying amount.

27. Share capital

Authorised 98,972 Ordinary shares of Ksh 20/= each (2018: 49,486 Ordinary shares of Ksh 20/= each)	1,979,434	989,717
Issued 98,972 Ordinary shares of Ksh 20/= each (2018: 49,486 Ordinary shares of Ksh 20/= each)	1,979,434	989,717

All issued shares have been fully paid.

The bank issued bonus share at a ratio of 1:1 to all their shareholders during the year.

28. Fair value reserve

The fair value reserve relates to the cumulative net change in fair value of financial assets until the investment is derecognised.

The current year movements have been set out in (Note: 14).

29. Statutory loan loss reserve

Where impairment losses required by legislation or regulation exceed those computed under International Financial Reporting Standards (IFRS's), the excess is recognised as a statutory reserve and accounted for as an appropriation of Retained Earnings. The reserves are not distributable.

Current liabilities	2,167,289	48,491

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

Figures in Kenyan Shilling ('000)	2019	2018
31. Lease liabilities		
The maturity analysis of lease liabilities is as follows:		
Within one year Two to five years More than five years	54,587 190,051 81,717	-
Less finance charges component	326,355 (144,365)	-
	181,990	
Non-current liabilities Current liabilities	271,768 54,587	-
	326,355	-

The Bank has elected not to recognise a lease laibility for short term leases (leases of expected term of 12 months or less) or for leases of low value assets. Payments made under such leases are expensed on a straight line basis. In addition, certain variable lease payments are not permitted to be recognised as lease liabilities and are expensed as incurred lease rentals on operating lease expense.

Comparative information for lease liabilities under IAS 17

The information presented for lease liabilities for the comparative period has been prepared on the basis of IAS 17, and therefore only represents the liability as at that date for finance leases and not for operating leases. In addition to the information presented in the table above, IAS 17 required an entity to present a reconciliation of the present value of lease payments for finance leases. This information is presented in the table which follows:

Present value of minimum lease payments due		
- within 1 year		128,378
- in second to fifth year inclusive		376,050
- later than five years		94,769
		599,197
32. Other liabilities		
Staff leave and gratuity accrual	302,252	245,567
Other accounts payable	250,114	220,852
Provisions for impairment on unutilised facilities and off balance sheet items	119,318	126,326
	671,684	592,745
33. Cash generated from operations		
Profit before taxation Adjustments for:	5,466,202	5,159,075
Depreciation and amortisation	150,057	42,761
(Profit)/Loss on sale of assets	(2,566)	460
Finance costs	42,601	-
Changes in working capital:	•	
Loan and advances to customers	(5,371,132)	636,433
Placements with other banks	3,056,643	(10,998,506)
Other assets	(39,398)	(165,588)
Placements from other banks	2,118,798	(4,640,447)
Customer deposits	15,215,099	28,953,452
Other liabilities	577,428	199,525
	21,213,732	19,187,165

Annual Report And Financial Statements for the year ended December 31, 2019

Notes to the Annual Report And Financial Statements

Figures in Kenyan Shilling ('000)	2019	2018
34. Dividends paid		
Dividends	(1,979,434)	(1,484,575)
Dividends proposed are from capital profits.		
35. Off-balance sheet financial instruments, contingent liabilities an	d commitments	
In common with banking business, the bank conducts business involving a letters of credit. The majority of these facilities are offset by corresponding		e bonds and
Contingent liabilities Spots	50,725	132,454
Letters of credit Letters of guarantees	1,958,613 3,319,570	2,750,738 3,574,439
Bills sent for collection	1,691,508	1,431,76

An acceptance is an undertaking by a bank to pay a bill of exchange on a specified due date. The bank expects most acceptances to be presented and reimbursement by the customer is normally immediate. Letters of credit commit the bank to make payments to third parties on production of credit compliant documents which are subsequently reimbursed by customers.

Guarantees are generally written by a bank to support the performance of a customer to third parties. The bank will only be required to meet these obligations in the event of the customers default.

Based on the estimate of the financial effect of the contingencies and the corresponding obligations from third parties, no loss is anticipated.

The bank has open lines of credit facilities with correspondent banks.

Commitments

Undrawn formal stand-by facilities, credit lines

4,735,719 4,626,868

7,020,416

7,889,392

Commitments to lend are agreements to lend to customers in future subject to certain conditions. Such commitments are normally made for a fixed period. The bank may withdraw from its contractual obligation for the undrawn portion of agreed facilities by giving reasonable notice to the customer.

The pending litigation claims relate to cases instituted by third parties against the bank. Judgement in respect of these cases had not been determined as at December 31, 2019. The directors are of the opinion that no liabilities will crystallise.

36. Earnings per share

Basic earnings per share is calculated on the profit attributable to the shareholders and on the weighted average number of shares outstanding during the year adjusted for the effect of any share issue during the year.

Net income for the period attributable to shareholders	4,092,770	3,929,580
Adjusted weighted average number of ordinary shares in issue (absolute)	74,229	49,486
Diluted/Basic earnings per share	55.14	79.41

Notes to the Annual Report And Financial Statements

37. Related parties

Included in loans and advances and customer deposits are amounts advanced to/received from certain directors and companies in which directors are involved either as shareholders or directors (related companies). In addition, contingent liabilities include guarantees and letters of credit which have been issued to related companies.

Key management includes the directors and other members of key management.

(a) Compensation to key management Short-term employee benefits	36,639	35,490
Post-employment benefits	11,729	9,770
	48,368	45,260
(b) Interest received from loans and advances to:		
Senior management employees	1,260	3,771
Other employees	38,825	169,400
	40,085	173,171
(c) Interest paid on deposits from:		
Senior management employees	26	42
Other employees	2,848	4,375
	2,874	4,417
(d) Management fees paid		
Related companies	63,045	23,866

37. Related parties (continued)

(g) Directors emoluments	2019	2018
Fees	1,325	980
Others	11,487	13,809
	12,812	14,789

All transactions with related parties were at arms length and at terms and conditions similar to those offered to other major customers.

38. Dividend payable

Proposed dividends 1,979,434 1,484,575

39. Capital commitments

Authorised capital expenditure

Already contracted for but not provided for Construction of Head Office building

700,000 228,000

Thee above are capital commitments relating to construction of the new Head Office building along Muthithi Road.

This committed expenditure relates to property and will be financed by available bank facilities, retained profits, existing cash resources, funds internally generated, etc.

40. Comparative figures

Previous year's figures have been regrouped / rearranged wherever necessary in order to make them comparable with that of current financial period.

41. Fair value

Fair value hierarchy

The table below analyses assets and liabilities carried at fair value. The different levels are defined as follows:

Level 1: Quoted unadjusted prices in active markets for identical assets or liabilities that the bank can access at measurement date.

Level 2: Inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

Previous year's figures have been regrouped / rearranged wherever necessary in order to make them comparable with that of current financial period.

42. Events after the reporting period

The financial statements were prepared based on management estimates and judgement as at the reporting date. Subsequent to year-end, there has been a coronavirus (COVID-19) outbreak which may have an impact on those estimates due to change in the business environment in which the Bank operates. However, due to the level of uncertainty resulting from the outbreak, management is currently assessing the impact.

The directors are not aware of any other material event which occurred after the reporting date and up to the date of this report.
